## The Technology

### SawStop Saws Detect Contact With Skin

The blade carries a small electrical signal, which the safety system continually monitors. When skin contacts the blade, the signal changes because the human body is conductive. The change to the signal activates the safety system.

## Global Issues

- Often a name based on Roman alphabet can work globally.

- For countries with different alphabets may need global variants or dual brands.

# Naming Criteria

- You may legally and practically use the name (e.g., dot-com domain available, trademark)
- Evokes the thing you are naming
- Positive associations
- Easy to say
- Unambiguous spelling
- Memorable
- Not too long
- (All in the context of target global markets.)

Help us pick a name for our new bicycle saddle company.

Our company's first product is a novel bike seat that increases comfort through the use of a flexible, pivoting seating surface.

Please tell us what you think about these options.

(This should take you about 5 minutes in total.)
